WORK EXPERIENCE

Founding Product Engineer

Jan 2023 – present

Jobprotocol

Remote

- I am the first and only engineer on the team, responsible for the whole product
- Frontend, backend, web3 work

Freelance Software Engineer

May 2022 - present

Toptal

Remote

- Working as a freelance engineer on projects focusing on data-science and backend engineering.
- Using my free time to develop an app on the side.

Founder in Residence

Mar 2022 – May 2022

Enterpreneur First

London

- I was accepted into the 2022 cohort and spent 2 months working with dedicated individuals on blockchain/web3 ideas.
- Unfortunately, I did not find the right co-founder/idea.

Software Engineer

Nov 2019 – Dec 2021

Google

Munich

- Using data analysis on production logs to improve reliability across Google. Used tensorflow, Go and Apache flume
- Came up with an lead an successful internal project combining data analysis and visualization.
- X, the moonshot factory: Data analysis on an experimental wearable device. Owned whole python codebase and training pipeline.

Deep/Machine Learning Engineer

Jul 2018 - Oct 2019

Volkswagen
Worked as an applied machine learning engineer, mainly on computer vision for autonomous driving.

• Real time object detection, Model development, training, selection, compression and testing.

RESEARCH WORK

Post Graduate Work

Jul 2017 – Jun 2018

TUM

Munich

Munich

- Uncertainty quantification in physical simulations using bayesian methods and machine learning.
- Design optimization under uncertainty.
- Collaborative development of a C++ research code (Full CI/CD pipeline).
- Visualization of complex simulation output using Paraview, Plotly, D3.js, ...
- Held several positions as teaching assistant.

Visiting Graduate Researcher

Oct 2016 - Jul 2017

Stanford University

California

- Implemented gradient computation in a C++ fluid dynamics code
- Application: Parametric shape optimization of flexible wings.
- Audited Stanford lecture series on machine learning by Andrew Ng.

Post Graduate Researcher

 $Jul\ 2017 - Jun\ 2018$

Munich Germany

- Uncertainty quantification in physical simulations using bayesian methods and machine learning
- Design optimization. Collaborative development of a C++ HPC codebase.

M.Sc. Mechanical Engineering

Oct 2015 – Jun 2017

TUM

TUM

Munich

- Majored in Computational Engineering and High Performance Computing.
- Visiting Researcher at Stanford University
- Overall Grade 1.6. Final theses 1.0.

B.Sc. Mechanical Engineering

Oct 2012 – Jun 2015

Munich

- Majored in Mechanical Engineering
 - Overall Grade 1.4. Final theses 1.0.

Professional Certifications

Online Multiple

- Total of 16 professional certifications including
 - * Blockchain Developer Nanodegree Udacity
 - * 5-part deep learning specialization Deeplearning.ai
 - * Decentralized finance Duke University
 - * Full list on LinkedIn

TECHNICAL SKILLS

- Languages: Python, C++, Solidity, Go, SQL, Javascript, Bash
- Frontend: Next, React, CSS, SASS
- Backend: Postgres, SQL, API development, Databases, Devops
- Machine Learning: Computer Vision, Recurrent Networks, Deep Learning, Model training and selection. Model compression.
- Blockchain: Bitcoin, Ethereum, Solidity, web3.js, Smart-Contracts
- Developer Tools: Git, Docker, Google Cloud Platform, VIM, IntelliJ
- Libraries: Tensorflow, Pytorch, OpenMP, MPI, CUDA, Pandas, NumPy, Matplotlib, Plotly, Dash
